Dear Sir: My husband and I farm and ranch in the state of Texas. We rely upon our XM radios for uptodate weather information when traveling from county to county checking on our livestock. We sometimes cover over 400 miles in one day. It is critical to our business to be able to obtain current weather information at a moments notice, both for our safety and that of our livestock. Please remember that there are those of us that don't just use XM for the Comedy channel.

Thank you for your time and consideration.

Sincerely yours,

M. J. albright
